# About

#### **OUR CLIENT**

This company provides luxury real estate services in Irvine, California. They are client-focused, helping to relieve stress in the home buying process.

#### **GOAL**

Our goal was to generate quality leads for the client and lower the campaign's CPR.

#### **PROJECT DURATION**

2 Weeks

#### **PROBLEM STATEMENT**

This campaign belonged to the housing special category and was location-specific. Over a period of time, the lead count can begin to decrease. We needed to overcome the challenge of lowering the campaign's cost per result.

### **Strategy (Overview)**

Our strategy was divided into phases in which we tested different combinations of targeting to increase leads and lower CPA.

#### **The First Phase**

We effectively utilized the existing campaign's data (especially leads) and created a set of special ad audiences.

#### **The Second Phase**

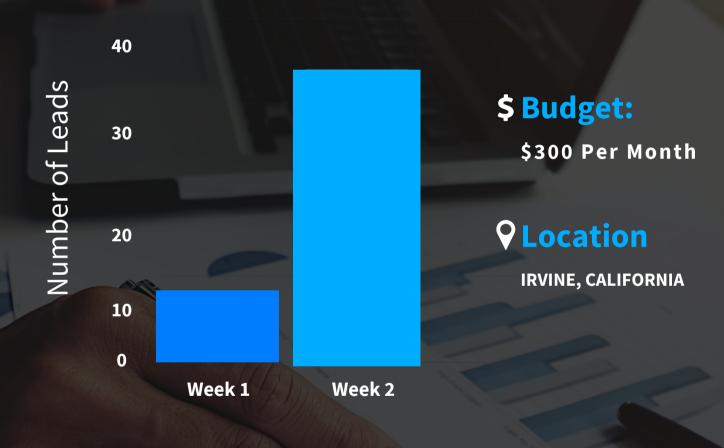

In our second phase, we converted prospects into leads by collecting their data via previously running campaigns.

#### **The Third Phase**

In our last phase, we remarketed to the warm leads that did not previously convert.

## **Number of Leads Per Month**

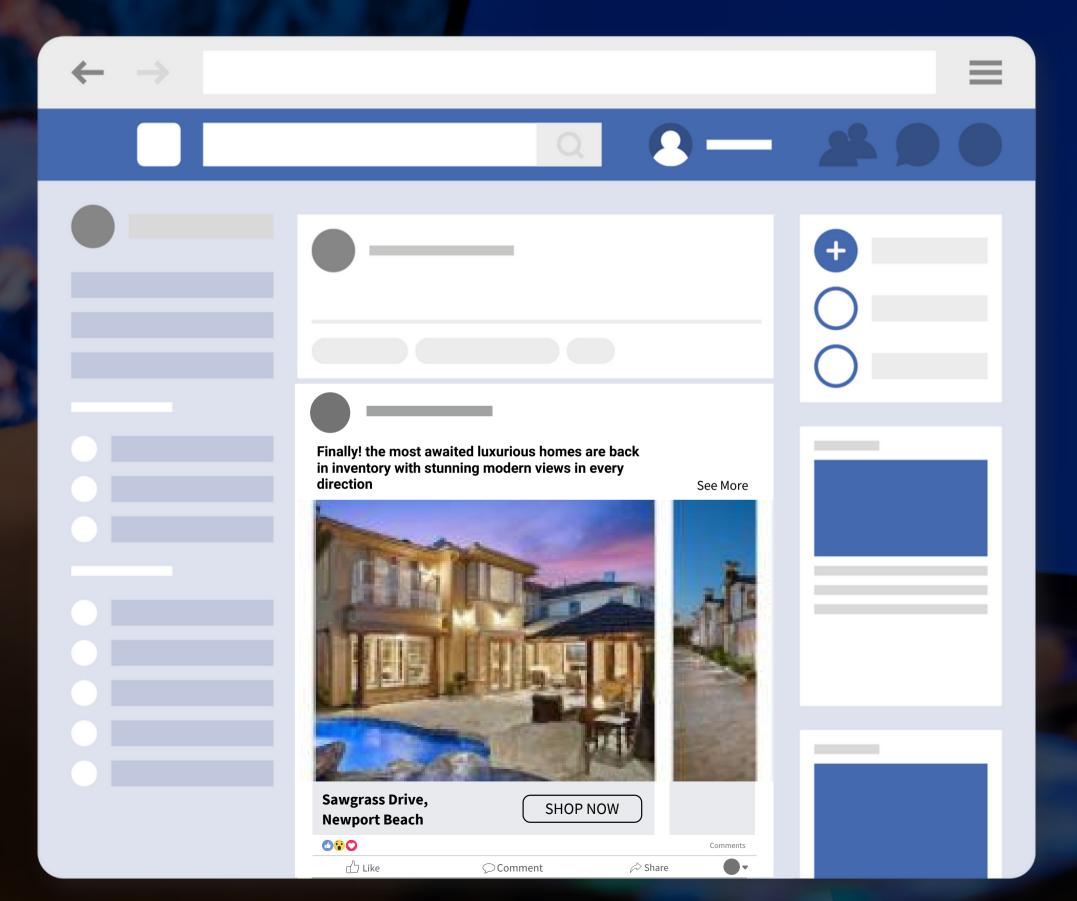

Week 1		Week 2		
Number of Leads	Cost Per Lead	Number of Leads	Cost Per Lead	
13	\$6.13	34	\$3.89	

## **Key Metrics**

Reach	Leads	CPR	CTR	СРМ
7,586	47	\$5.01	2.13%	\$20.76

# Best Performing Ad

# Solution

After performing split-tests between single image ads and the carousel ads, we found that the carousel ads were more effective for this campaign.

# **Final Outcome**

We successfully achieved our goal and reduced the campaign's CPR by almost 50%. The client began generating significant revenue from the ads.
